

Yes. At this point, we have enough to put the entire **BE Graphic Studio service system** into one structure, including deliverables and a practical pricing model.

I also checked current Nigerian branding offers so the pricing isn't being invented in isolation. Current public examples range from roughly ₦150k starter identity work to ₦450k corporate packages, while more strategy-led firms publish around ₦800k for brand identity, ₦1.8m for full strategy + identity, and ₦900k–₦1.8m for broader growth-oriented branding engagements. ([Zerix Agency](#))

For BE, I would position the pricing **above commodity design pricing but deliberately below large-agency barriers**, especially while the relaunch is establishing the new positioning.

BE GRAPHIC STUDIO — SERVICE & PRICING ARCHITECTURE

01. BE SERVICE PHILOSOPHY

BE does not sell:

Basic → Standard → Premium

and it does not believe every business needs the same amount of branding.

Instead:

A business comes with a need. BE determines what level of branding work is actually required to solve that need.

The price therefore reflects:

The problem → depth of strategy → scope of creative work → number of touchpoints → complexity → implementation required.

This allows BE to remain accessible without reducing branding to cheap packages.

02. THE BE BRAND-BUILDING MODEL

Everything BE does is built around:

UNDERSTAND

Understand the business, market, audience and current brand.

POSITION

Determine what the business should stand for and where it should compete.

COMMUNICATE

Determine what the brand should say and how it should say it.

EXPERIENCE

Shape how people encounter and interact with the brand.

EXPRESS

Translate the strategy into visual identity and creative expression.

SYSTEMIZE

Build the systems needed to keep the brand consistent and scalable.

THE OUTCOME

Stronger brand understanding + stronger communication + stronger market perception + a foundation for growth.

03. CORE SERVICE AREAS

A. BRAND STRATEGY

What BE does

This is the strategic foundation behind the brand.

Possible work includes:

- Brand discovery

- Brand analysis
- Market research
- Audience analysis
- Competitor analysis
- Brand purpose
- Brand values
- Brand positioning
- Brand personality
- Brand architecture
- Strategic recommendations

Deliverables

Depending on scope:

Brand Analysis Report

Brand Strategy Document

Audience Profile

Competitor/Market Analysis

Positioning Framework

Brand Purpose & Values

Brand Personality

Strategic Recommendations

Standalone price

From ₦150,000

Typical larger strategy engagement

₦250,000 – ₦500,000+

The final price depends heavily on research depth and scope.

04. BRAND POSITIONING

This can either be part of Brand Strategy or purchased as a focused engagement.

Deliverables

- Positioning statement
- Target audience definition
- Competitive landscape
- Differentiation
- Value proposition
- Brand promise
- Positioning territories
- Key strategic messaging direction

Price

From ₦150,000

For a deeper positioning project:

₦250,000 – ₦350,000+

05. BRAND COMMUNICATION

This is where BE develops how the brand communicates.

Deliverables

Depending on scope:

- Brand messaging framework
- Brand voice
- Tone of voice
- Messaging pillars
- Key brand messages
- Tagline/brand line exploration
- Brand story
- Communication principles
- Sample applications
- Content direction

Price

From ₦150,000

More comprehensive communication systems:

₦250,000 – ₦450,000+

06. BRAND IDENTITY

This is the visual expression of the strategy.

Deliverables

Depending on scope:

- Primary logo
- Secondary logo variations
- Symbol/mark
- Colour system
- Typography system
- Visual direction
- Graphic language
- Image/photography direction
- Iconography where relevant
- Basic brand applications
- Brand guidelines

BE Identity Engagement

From ₦300,000

A stronger identity system:

₦450,000 – ₦650,000+

A more comprehensive identity system with strategy included:

₦650,000 – ₦900,000+

This places BE in an accessible middle ground rather than competing with ultra-low-cost identity offers or immediately pricing like a large Lagos agency. Current published Nigerian examples include ₦150k starter identity, ₦450k corporate identity, and roughly ₦800k+ for broader identity work. ([Zerix Agency](#))

07. BRAND EXPERIENCE

This is intentionally flexible because experience requirements differ significantly by business.

Possible deliverables

- Customer journey mapping
- Brand touchpoint mapping
- Website experience direction
- Packaging experience
- Social media experience
- Physical touchpoint direction
- Customer interaction guidelines
- Digital brand experience direction

Price

From ₦200,000

Complex experience projects:

₦350,000 – ₦750,000+

Website development itself should remain a separate implementation service rather than automatically being included in “branding.”

08. BRAND SYSTEMS

This is what makes the brand usable and scalable.

Deliverables

- Brand guidelines
- Design system
- Social media design system
- Templates
- Marketing collateral system
- Presentation templates

- Document templates
- Asset library
- Implementation guidelines
- Internal brand-use guidance

Price

From ₦150,000

Comprehensive brand system:

₦300,000 – ₦600,000+

09. BRAND IMPLEMENTATION

This is where the strategy and identity become real-world applications.

Possible work includes:

Digital

- Website design
- Social media setup
- Social media templates
- Email signatures
- Digital advertisements
- Digital presentations

Physical

- Business cards
- Stationery
- Packaging
- Signage
- Marketing materials
- Branded materials

Commercial

- Company profile
- Pitch deck

- Proposal templates
- Sales materials
- Campaign assets

Pricing

Scoped individually.

Rather than attaching arbitrary quantities to a package, BE should quote according to the actual number and complexity of applications.

10. BRAND DISCOVERY

This becomes one of BE's distinct entry points.

For businesses saying:

“Something isn't working with our brand, but we don't know what.”

Deliverables

- Discovery session
- Brand audit
- Visual audit
- Communication audit
- Market/competitor review
- Brand strengths & weaknesses
- Opportunity areas
- Recommended next steps

Price

₦100,000 – ₦200,000

I would recommend BE's standard entry price be around:

₦150,000

This is consistent with current Nigerian public examples for brand/website audits while still creating a meaningful consulting product. ([Brela Agency](#))

11. BRAND BUILD

This is one of BE's **main engagements**.

It is not a fixed package.

It means:

Build the brand the business actually needs.

The engagement can combine:

Strategy + Positioning + Communication + Experience + Identity + Systems

depending on the project.

Typical deliverables

- Brand discovery
- Brand strategy
- Positioning
- Messaging
- Brand voice
- Visual identity
- Brand guidelines
- Core brand applications
- Brand system
- Launch/implementation guidance

Recommended BE pricing

From **₦500,000**

Typical growing-business engagements:

₦650,000 – ₦1,200,000

Complex brand-building projects:

₦1,200,000 – ₦2,000,000+

That keeps BE accessible while recognizing that strategy-led branding is significantly more valuable than logo-only work. Current Nigerian public pricing supports a market where integrated identity work can reach ~~₦800k–₦1.8m~~ and broader growth-focused engagements can reach ~~₦900k–₦1.8m+~~. ([Brela Agency](#))

12. BRAND EVOLUTION

For existing businesses whose brand has outgrown its current form.

This is BE's alternative to casually calling everything a “rebrand.”

Deliverables may include

- Brand analysis
- Existing brand audit
- What-to-keep / what-to-change assessment
- Strategic refinement
- Positioning refinement
- Communication refinement
- Visual evolution
- Identity redesign where required
- Updated guidelines
- Brand implementation
- Rollout support

Pricing

From ₦450,000

Typical engagements:

₦650,000 – ₦1,500,000+

Full transformation:

₦1,500,000 – ₦2,500,000+

13. BRAND IMPLEMENTATION ENGAGEMENT

For brands that already have their strategy and identity but haven't successfully put the brand into the marketplace.

Deliverables

Depending on needs:

- Brand rollout
- Social media system
- Marketing materials
- Presentation system
- Website application
- Packaging application
- Campaign assets
- Templates
- Internal brand tools
- Brand implementation guidance

Pricing

From ₦250,000

Larger implementation projects:

₦500,000 – ₦1,000,000+

14. BRAND PARTNERSHIP

This is the ongoing support model.

This is where your original idea of assigning a **BE Branding Expert** becomes a real service.

After the main branding engagement, the client can retain BE.

What the BE Brand Expert does

- Brand guidance
- Creative review
- Brand consistency checks
- Design direction
- Communication guidance
- Content review
- Strategic advice
- Implementation support
- Brand evolution guidance

This is **not unlimited design**.

The expert is there to help the client **protect and grow the brand**.

Suggested monthly pricing

Brand Support

£150,000/month

For lighter support.

Brand Partner

£250,000/month

For more active strategic and creative support.

Brand Growth Partner

£400,000+/month

For businesses requiring deeper involvement, regular strategic input and larger ongoing brand needs.

These retainers should have clearly defined response times, meeting frequency, deliverable limits and scope so BE does not accidentally sell unlimited access.

15. BE ACADEMY

The Academy should remain separate from the agency pricing.

Possible revenue streams:

Courses

Workshops

Masterclasses

Cohort programmes

Corporate training

Design/branding mentorship

Educational resources

The Academy is not simply another service.

Its strategic role is:

Changing how branding and design are understood and valued.

16. THE BE ENGAGEMENT ARCHITECTURE

Now we can combine everything.

DISCOVER

Brand Discovery

~~£~~100k–~~£~~200k

BUILD

Brand Build

~~£~~500k+

EVOLVE

Brand Evolution

~~£~~450k+

IMPLEMENT

Brand Implementation

₦250k+

PARTNER

Brand Partnership

₦150k/month+

And underneath those engagements are the actual disciplines:

Strategy

Positioning

Communication

Experience

Identity

Systems

This is much cleaner than presenting 25 separate services to a client.

17. WHAT CLIENTS ACTUALLY BUY

This is important.

BE should not lead its website with:

Logo Design — ~~₦~~300k

Brand Colours — ~~₦~~50k

Business Card — ~~₦~~20k

Flyer — ~~₦~~10k

That immediately turns BE into a commodity design vendor.

Instead, the client-facing structure should be:

“What does your business need?”

I need to understand what's wrong with my brand.

→ Brand Discovery

I need to build my brand properly.

→ Brand Build

My business has changed and my brand hasn't.

→ Brand Evolution

I already have a brand but need help applying it.

→ Brand Implementation

I need someone to stay with us and help manage the brand.

→ Brand Partnership

Then BE scopes the actual services inside.

That's much more aligned with everything we've built.

18. BE'S ACCESSIBILITY MODEL

This is where I would be especially careful.

BE's promise is **accessibility**, not indiscriminate discounting.

So instead of reducing the quality of the work, BE can make branding accessible through:

Scope flexibility

Not every business needs everything.

A business can get the **right level of branding** rather than paying for unnecessary deliverables.

Payment structure

For larger engagements:

50% commencement → 25% midpoint → 25% completion

Or:

40% → 30% → 30%

for larger projects.

Phased branding

A business can build progressively.

For example:

Phase 1: Strategy + Positioning

Phase 2: Communication + Identity

Phase 3: Systems + Implementation

Phase 4: Ongoing Partnership

This is actually much more faithful to your philosophy than simply making everything cheaper.

Growing-business pricing

BE can maintain an intentionally accessible pricing band for qualifying growing businesses while charging higher prices for larger or more complex organizations.

19. WHAT NOT TO DO

I would **not** publish:

“Affordable branding from ~~N~~50k.”

That would undermine the new positioning.

I also wouldn't promise:

“World-class branding at affordable prices.”

That's generic and makes affordability the headline.

The better philosophy is:

Quality branding should be accessible to growing businesses.

Then demonstrate it through the **scope and pricing structure**, not through discount language.

20. THE BE SERVICE SYSTEM IN ONE VIEW

BE GRAPHIC STUDIO

STRATEGY

Brand Strategy
Brand Analysis
Positioning

BUILD

Brand Communication
Brand Identity
Brand Experience
Brand Systems

ENGAGE

Brand Discovery
Brand Build
Brand Evolution
Brand Implementation
Brand Partnership

EDUCATE

BE Graphic Studio Academy

Recommended initial BE price floor

For the relaunch, I would avoid taking serious strategy/identity projects below roughly **₦300k** unless the scope is genuinely small.

A useful internal pricing ladder would be:

Engagement	Recommended starting point
Brand Discovery	₦150,000
Focused Brand Strategy	₦250,000

Brand Identity	₦ 300,000
Brand Communication	₦ 150,000
Brand Experience	₦ 200,000
Brand Systems	₦ 150,000
Brand Build	₦ 500,000
Brand Evolution	₦ 450,000
Brand Implementation	₦ 250,000
Brand Partnership	₦ 150,000/month

These are **recommended BE starting points, not rigid market facts**. The current Nigerian market is highly fragmented: publicly listed offers range from low-cost identity packages to ₦1m+ strategic engagements, so scope and positioning matter considerably. ([Zerix Agency](#))

One thing I would change from the earlier structure

I would **not expose every one of these prices publicly**.

Your public website should probably show:

Starting from ₦150k for Discovery and smaller strategic work,
₦500k+ for Brand Build,
 and **Custom** for larger Brand Evolution/Implementation/Partnership engagements.

The internal BE pricing sheet can contain the full ranges.

That gives you transparency without turning a complex branding engagement into a shopping cart.

This gives us a **complete first version of the BE services, deliverables, engagement model and pricing philosophy**. The next strategic piece is to turn this into the **actual client journey and sales process**, from “I discovered BE” → consultation → diagnosis → proposal → payment → strategy → delivery → handoff → Brand Partnership.
